SWISS PRODUCTION

# HAKAMA AG: Your supplier of sheet metal packaging solutions for the medtech industry

We are an international supplier of customized products for the medical and analytical technology market. We develop and produce individual, high-precision equipment and sheet metal housings in combination with other materials.

## Engineering

Through engineering competence and process orientation we develop new ways for our clients to compete in a global environment. Longstanding knowledge of the industry and our capabilities as a general service contractor make HAKAMA a preferred partner for feasible, easy-to-apply product solutions in the manufacturing industry.

'Revolution of products' is our claim and stands for making use of our specialized know-how in the planning and realization process, as well as making the most of the nearly infinite possibilities of sheet metal in combination with other materials.

## Single and serial production

We produce equipment, complex housings, and single components, from prototyping to ready-to-manufacture, on the basis of CNC stamping and bending technology and up-to-date laser technology. HAKAMA is your proven production specialist with more than 50 years of experience and a comprehensive portfolio of customized products for different areas of business such as:

nanotechnology, biomedical, medical and analysis technology, diagnostic systems for laboratories, chemical industry and environment, physiotherapy and electro-surgery, as well as orthopaedics, X-ray, and dental technology.

## Your benefits

- High consultancy quality in engineering and product design.
- Feasibility comes first.
- Our know-how of and assistance with the evaluation of external components.
- Fast prototype production.
- All-from-one single source, from engineering to serial production.
- Products according to your personal requirements, compliant with all standards, and all at a market competitive price.
